DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 70-83, drawn to a conveyor system, classified in class 700, subclass 228.
 - II. Claims 84-97, drawn to method for dynamically controlling article flow, classified in class 198, subclass 358.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, e.g., the process of propelling a conveying surface.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3651

4. During a telephone conversation with Fredrick S. Burkhart on 16 Dec 2004 a provisional election was made without traverse to prosecute the invention of Group I, claims 70-83.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 84-97 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Allowable Subject Matter

6. Claims 70-83 are allowed over the prior art of record.

7. The following is an examiner's statement of reasons for allowance:

The claimed combination, wherein comprising a master controller that transmits a speed command based upon said route to said plurality of conveyor bed controllers over said network, wherein said conveyor bed controllers send said speed command to said associated motor controllers to operate said associated motorized roller at a speed based on said calculated route, is allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner's Amendment / CLAIMS CANCELLED

8. This application is in condition for allowance except for the presence of claims 84-97 which were non-elected without traverse. Accordingly, claims 84-97 been cancelled.
